BEVEL SEAT FITTINGS....

Bevel Seat Fittings are used on process equipment and piping to ensure rigidity of the system. Bevel Seat Unions consist of a Threaded Bevel Ferrule mated with a Plain Bevel Ferrule. Both are offered in T304 and T316L material. Hex Union Nuts made of only T304 material are used to complete the union. Gaskets for VNE's Bevel Seat Unions are not required for positive shut-off. However, gaskets may be purchased upon request.

VNE's Bevel Seat Fittings meet all 3A requirements and are available in 1" through 4" sizes.

European Din Connections....

VNE's European Din Connections are available in Inch-Size Tube O.D. Weld Neck. Now inch size tubing can be utilized on projects requiring Din Connections, where in the past metric tubing had to be purchased.

VNE stocks welding ferrules - both male (threaded) and female (plain) - along with the standard DIN nut and gasket to complete the union in T304. T316 ferrules and other metric fittings are available upon request.
