

VALVES

Butterfly Valves

BUTTERFLY VALVES

"B" SERIES BUTTERFLY VALVES

BUTTERFLY VALVES....

Butterfly Valves are available in Manual, Air Actuated, or Air Actuated with two Micro switches and a Solenoid Valve. Clamp or Weld ends are standard. Other connections are available upon request.

Available seat materials include Silicone, Viton®, and EPDM. Sizes range from 1" through 4". All product contact surfaces are available in either T304 or T316 stainless steel.

BUTTERFLY VALVES SPECIFICATIONS....

Size Range: 1" through 4" sizes available

Materials: T304
T316

Info: All stainless handle with eight positions is standard. Each position is set in 45° increments.

Silicone seats are standard - other seats available are EPDM and Viton®.

Check Valves

CHECK VALVES

BALL, SPRING AND AIR BLOW CHECK VALVES

CHECK VALVES....

Check Valves are widely used for both sanitary and industrial applications to prevent backflow of product.

Ball Check Valves are designed to allow full product flow during processing. Once the product flow stops the ball rolls back to the seat at inlet preventing back flow. Ball Check Valves are commonly used with liquid products. Sizes range 1 1/2" - 3".

Spring Check Valves are designed to assist closure pressure to create a positive shutoff. They are commonly used with liquid products. Sizes range 1" - 4".

Both valves are offered with clamp or weld ends. Other connections are available upon request. Valves are made of T316L stainless steel.

Air Blow Check Valves are designed to evacuate lines of product or CIP solutions. Air Blow Check Valves are made of T316L Stainless Steel.

VALVES

Ball Valves

BALL VALVES....

Ball Valves are used in a wide variety of high pressure applications. Two factors make them popular. First, a full unrestricted flow that allows no product restrictions through the valve. Second, the three piece design and the removal of a minimal number of bolts allows service to be performed without removing the complete valve from the line.

VNE offers two way ball valves made of T316 (CF8M) stainless steel. PTFE seats are easily removed. Clamp and Weld ends are standard. Other connections are available upon request. 1/2" through 4" sizes are available. Ball Valves meet 3A requirements.

BALL VALVE SPECIFICATIONS....

Size:	1/2", 3/4", 1", 1 1/2", 2", 2 1/2", 3", 4"	
Material:	Passivated 316 Stainless Steel (ASTM A351, CF8M)	
Connections:	Clamp, Buttweld, & Orbital weld - other connections available upon request	
Working Pressure:	1/2" - 1"	1,000 psi
	1 1/2" - 2"	1,000 psi
	2 1/2" - 4"	600 psi

ORDERING SPECIFICATIONS....

Specify:	• Quantity
	• Product description or Part No.
	• Size
	• Material Type

IMPORTANT FEATURES...

- 3 - Piece design - allows valve ends to remain attached while servicing valve body
- Meets 3A requirements
- 100% Tested
- Valves marked with heat numbers for full identification and traceability
- English hardware
- Maintenance and servicing is made easy with removal of a minimal number of bolts
- Reinforced Teflon® Seats
- PTFE Cavity Filler, fully encapsulated
- Locking device handle
- Air Actuator mounting kits which include ISO-5211 pads are available
- Repair kits are available

VALVES

PVA Valves

PVA VALVE

VNE'S MODULAR DESIGN SANITARY PROCESS VALVE

PVA VALVE....

This valve has an all stainless one piece stem which seals against the body O-ring for positive shut off. With this design, no seals, disks, or O-rings are fastened to the stem, which could cause product entrapment.

MODULAR DESIGN....

A modular design is used throughout this entire line of valves.

SANITARY....

PVA valves meet 3A requirements. With this state of the art design, it allows optimum CIP cleaning of all product contact surfaces.

PVA VALVE....

- Available in 1.5" - 3"
- Made from T316L Stainless Steel
- Offered as EPDM Standard with Viton® and Silicone options.
- Available in Shut off, Divert, and Tank Outlet Configurations.
- Available with Clamp, Weld, Bevel Seat, and E-Line connections. Other connections are available upon request.
- Available in manual or air actuated. An electronic control head can be used with these air operated valves.

PVA ACCESSORIES....

- Micro switches with Solenoid Valve 110 or 24 volt.
- Indicating lights for open and closed position.
- Tank Bottom Adapter - For Tank Outlet Valve

PVA ACTUATOR....

- Maintenance free
- Instantly reversible from normally open (NO) to normally closed (NC) or vice versa.
- Instant assembly of electronic control head.
- Two size Actuators: 4" diameter for 1 1/2" and 2" valves. 5" size for 2 1/2" and 3" valves. Made from T304 Stainless Steel.
- Position indicator stem on top of actuator shows open or closed position.
- Operating Air Pressure range 72 - 108 PSI.
